OFFICE OF  
COMMISSIONER  
FEDERAL COMMUNICATIONS COMMISSION

Ms. Susan Ness  
1919 M Street, N.W.  
Washington, DC 20554

Dear Ms. Ness:

I am writing to you regarding the proposed rule making currently before the FCC regarding Low-Power FM Radio (LPFM). You may already be aware that the proposed rule making will create an entirely new class of radio, community radio. Design for, and run by local communities.

As a result of the Telecommunications Reform Act of 1996, ownership of existing classes of AM and FM broadcast stations has been increasingly concentrated in a limited number of hands. Along with a resultant loss in the diversity of ownership, comes a loss in diversity of programming. Localism in broadcast programming has been taken away, replaced by mass media coverage.

I believe that the proposals set forth by the FCC will broaden the spectrum by which local voices can access the public forum.

Bring about new degree of Community participation and involvement.

Offer educational, information, and entertainment alternatives.

Create new opportunities for local small businesses, and broadcast ownership.

The escalating value of existing classes of broadcast stations has increasingly resulted in outlying stations shifting their focus toward nearby metropolitan areas, often at the expense of the communities these stations were originally intended to serve. Authorization of LPFM could return local broadcast service to many of these communities.

In addition, Rep. David E. Bonior of Michigan has composed a letter to be sent to FCC Chairman William Kennard on March 10<sup>th</sup>. If you agree with the LPFM proposed full making, I urge you to sign on to this letter. I have included a copy for your inspection.

Again, I urge you to support the FCC & Chairman Kennard on this rule making, and to let the other congressional leaders know that your constituents are demanding a voice in their communities.

Thank you for your time.

Sincerely,

Kim Burnett

To Whom It May Concern:

As part of driving to work, I listen to the radio. The similarity between stations is obscene. We need to bring local radio shows back to add diversity to our listening choices. JACOR owns/runs a large portion of our airwaves; therefore, they regulate and decide what we want to hear. It is not difficult to think that a local radio show, as opposed to a corporate owned, could boost community involvement and morale. (Especially since local shows recruit volunteers to do the segments).

Another benefit is the sociopolitical arena it would open up. A local show could provide a forum for diverse voices and opinions, thus in effect challenging the community to think and act. Low-Power FM radio can be a positive influence, please help us support it.

Sincerely,

A handwritten signature in cursive script that reads "Y. Elizabeth Casteel".

March 29, 1999

Dear Ms. Ness,

I am writing to support low-power FM Radio. There are many reasons why local radio is essential to a healthy community. First, local radio creates an easy access for community participation and stimulation of the local voices culturally. The idea of, "It's just little old me," or "what can I do?" diminishes when people have access to the power of speech. The local radio is a catalyst for people of all gender, race, or orientation to show their point of view. It allows for the "understanding" of cultural misunderstandings. Communication is an answer to community empowerment. Empowerment leads to a proactive and healthy community.

Second, local radio can stimulate local businesses with lower cost advertising. It would only help the community when businesses have an affordable option to advertise their local shops and centers. Again, local radio can help the community by stimulating the local economy. When there is more money in the community, the community appears more acceptable and well adjusted.

Local radio is not only healthy for the community but essential. Please support the Free the Airwaves Campaign.

Sincerely,

Casea Kim
